15 Question = Karin Jansson,

This is in response to your letter dated 6-21-99.

Thank you for the insights on how to better utilize my
Back-A-Traction.

I am in my 29th year of service as a police officer. In March of 1976, I was involved in a serious car accident and sustained injury to my neck and upper back. This disabling injury has not gotten better with time, in fact it worsens with time. Several years ago, I saw your traction unit while I was working, this was during the twelve days of the Minnesota State Fair. I thought that it was just for the lower back. However, desperate men do desperate things. I waited in line and was assisted into the unit and found releif for my upper back and neck.

The weight of my upper body and head caused traction and releif. I went back each day of the Fair. I found myself doing this year after year during the Fair and wishing that I could afford to purchase a Unit for my care and improve my quality of life. You ceased showing the product several years later.

Through work, I was able to test, then acquire a unit. I use the Back-A-Traction several times a day to help cope with the incessant pain. While on the unit, I stretch and manipulate the spine and tissue, this helps immensely.

I combine this with stretches on the floor, medication, medical attention, physical therapy, chiropractic and a cervical traction unit. The pain does not go away, but I am more able to manage it myself. This reduces my trips to the doctor, chiropractor and physical therapy. Managing it myself also helps reduce the costs of these services. First thing in the morning, in the middle of the night, during the day, home from work, this aids me in managing the pain, crippling effects and assists with increased mobility.

I know that my life is better due to the assistance of your product. Meeting you and your father and being taught new ways of using the unit for my benefit have helped. I thank you for your product and meeting both of you was an absolute pleasure. I hope you enjoyed your trek to the Swedish community of Scandia. Please E-Mail me back. I look forward to hearing from you and arriving at a proper testimonial.
